(518)-713-8070 | byc27@cornell.edu | 1613 Murasky Pl, San Jose, CA

EDUCATION

Cornell University
B.S. Information Sciences; *Minor: Entrepreneurship & Business*

Ithaca, NY
May 2027

RELEVANT EXPERIENCES

AWISCO | HR Tech Intern June 2026 - August 2026 | **Queens, NY**

- Built automated onboarding workflow reducing new-hire setup time by 40%, adopted across 3 departments
- Designed and shipped internal HR dashboard used daily by 20+ managers to track headcount and compliance
- Partnered with engineering to scope and prioritize a 6-feature roadmap based on employee NPS feedback

SubmissionSensAI | Product Manager Intern December 2025 - May 2026 | **Ithaca, NY**

- Owned end-to-end launch of semantic search feature; reduced user drop-off by 22% in A/B test across 1,200 users
- Translated user, athlete, and coach feedback into product requirements, roadmap proposals, prioritization decisions
- Partnered with engineers and designers to scope features, clarify tradeoffs, and drive execution from concept to launch

LX Semicon | Business Intern June 2025 - August 2025 | **Santa Clara, CA**

- Researched and profiled global prospects for copper conductor sheets; analyzing industry trends, mapping decision makers, and aligning technical applications (busbars, PCS reactors, transformers) to customer ESS product needs
- Coordinated with supply chain, marketing, and technical teams to address customer inquiries & delivery timelines

GoAhead & LvlUp Ventures | Venture Scout May 2025 - Nov 2025 | **Menlo Park, CA**

- Conducted market research across AI, hardware, B2B/B2C SaaS, and emerging technologies in various industries
- Established relationships with incubators, sourcing 30+ startups outside of GoAhead & LvlUp's usual footprint
- Pitched GoAhead & LvlUp's thesis to founders on demo days and pitch days, working to increase monthly deal flow

Willowbrook Capital | Private Equity Intern February 2025 - June 2025 | **Los Angeles, CA**

- Conduct market research in B2B software, analyzing key financial metrics including EBITDA and ARR growth
- Develop investment theses through analysis of market dynamics, competitive positioning, and consumer behavior
- Sourced 300+ potential acquisition targets while maintaining customer relationships through outreach emails and calls

Messer Lab, Cornell University | Coding Research Intern June 2022 - January 2024 | **Ithaca, NY**

- Co-author in a published paper and assisted mentor presenting for the International Congress of Genetics in Australia
- Developed new method of simulating population models, cutting computational time by 90% compared to old models
- Implemented resource-explicit spatial models, enabling more biologically realistic simulations and populations

PROJECTS

Are We There Yet? | Link: <https://are-we-there-yet.4300showcase.infosci.cornell.edu> April 2026

- Developed an immigration recommendation system that matches users to countries based on structured profile data and free text vibe queries using TF-IDF and cosine similarity combining numeric and semantic matching techniques
- Constructed country profiles by scraping from Reddit immigration communities, capturing qualitative dimensions

Weather Better | Link: <https://doomcodingbryan.github.io/WeatherBetter/#edge> June 2026

- Built web app that prices prediction-market contracts against live weather data using the NWS forecast API; Automated a live data pipeline scheduling a 15-minute cron job that fetches, paginates, and validates a Kalshi market snapshot; deployed signals to Kalshi, generating \$400 in verified profit within 3 weeks
